Chennai, Tamil Nadu | +91-8072502532 | sankarganesh.5.sh@gmail.com | github.com/Sankarganesh-S | linkedin.com/in/sankarganesh

OBJECTIVE

Full Stack Developer focused on React.js, with hands-on internship experience building a production-facing admin panel. Skilled in responsive UI development, state management, REST APIs, and Git workflows; seeking a React Developer role.

EDUCATION

Government Polytechnic College, Madurai — Diploma in Electrical and Electronics Engineering (2024)

INTERNSHIP EXPERIENCE

React Developer Intern — Liz-Foods Admin Panel

4 Months (Ongoing)

- Contributed to a React-based internal admin panel for product, order, and business operations.
- Implemented Redux state management and IndexedDB persistence for centralized data handling and offline access.
- Built reusable, responsive components and integrated REST APIs for real-time data handling.
- Used React Hooks (useState, useEffect, useContext) for component state and side effects.
- Participated in code reviews, Git branching/merging, and debugging of production-facing UI and state issues.

PROJECTS

WeatherAPI App | React.js, Tailwind CSS github.com/Sankarganesh-S/weather-app

- Built a responsive weather app with API integration for real-time temperature, conditions, humidity, and location data.

Responsive Portfolio Website | HTML/CSS/JavaScript github.com/Sankarganesh-S/portfolio

- Created a mobile-friendly portfolio with smooth scroll animations showcasing projects, skills, and contact information.

Login Page with Animation | React.js, React Router github.com/Sankarganesh-S/login-page

- Developed a responsive login interface with form validation, animations, routing, and interactive input feedback.

E-Commerce Product Dashboard | React.js, Redux, IndexedDB github.com/Sankarganesh-S/ecommerce-dashboard

- Built product CRUD workflows with centralized state, offline persistence, live search, and category filtering.

Task Manager with Offline Support | React.js, Redux, IndexedDB github.com/Sankarganesh-S/task-manager

- Developed task CRUD functionality with Redux state control, offline persistence, status filtering, and smooth list transitions.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS

State & Storage: Redux, IndexedDB, Local Storage, useContext

APIs: REST APIs

Tools: Git, GitHub, VS Code

STRENGTHS

Problem solving, quick learning, attention to detail, clean and maintainable code, consistent Git/GitHub practices.
