Objective

Motivated Full Stack Developer with hands-on internship experience building a production admin panel using React.js. Skilled in developing responsive, user-friendly web applications and eager to contribute to a dynamic development team as a React Developer.

Education

Government Polytechnic College, Madurai. Year of Completion: 2024

Diploma in Electrical and Electronics Engineering

Internship Experience

React Developer Intern 4 Months (Ongoing)

Project: Liz-Foods Admin Panel

- Working as part of the development team on the Liz-Foods admin panel, a React-based internal application for managing products, orders, and business operations.
- Implemented and maintained application state using Redux for predictable, centralized data management across admin modules.
- Used IndexedDB for client-side data storage, enabling offline access and faster data retrieval within the admin panel.
- Built reusable, responsive UI components using React.js and integrated REST APIs for real-time data handling across the panel.
- Worked with React Hooks (useState, useEffect, useContext) to manage component-level state and side effects efficiently.
- Participated in code reviews and followed Git-based version control workflows for feature branches and merges.
- Debugged and resolved UI and state-management issues in a live, production-facing application, and collaborated closely with senior developers to understand real-world React application architecture and best practices.

Projects

WeatherAPI App | React.js, Tailwind CSS

github.com/Sankarganesh-S/weather-app

- Built a weather forecasting application using React.js and Weather API integration, displaying real-time temperature, conditions, humidity, and location-based data.
- Created a responsive and modern UI using Tailwind CSS with dynamic weather updates.

Responsive Portfolio Website

github.com/Sankarganesh-S/portfolio

- Designed a fully responsive personal portfolio with modern UI design and smooth, scroll-based animations optimized for mobile and desktop.
- Showcases projects, skills, and contact information in a clean, professional layout.

Login Page with Animation

github.com/Sankarganesh-S/login-page

- Developed a login page with form validation, animations, and smooth UI transitions using React state management and React Router.
- Improved user experience with responsive design and interactive feedback on form inputs.

Projects

E-Commerce Product Dashboard | React.js, Redux, IndexedDB

github.com/Sankarganesh-S/ecommerce-dashboard

- Built a product management dashboard with Redux for centralized state and IndexedDB for offline-first data persistence, with add/edit/delete workflows, live search, and category-based filtering.
- Structured reusable components and custom hooks to keep the codebase scalable and easy to maintain.

Task Manager with Offline Support | React.js, Redux, IndexedDB

github.com/Sankarganesh-S/task-manager

- Built a task management app with add, complete, and delete functionality using React hooks and Redux for state control, persisting tasks offline with IndexedDB.
- Implemented clean UI with status-based filtering (All / Active / Completed) and smooth list transitions.

Technical Skills

- **Frontend:** HTML5, CSS3, TailwindCSS , JavaScript ,React.js, Redux,
- **State Management :** Redux, IndexedDB, Local Storage, useContext
- **Other:** REST APIs
- **Tools:** Git & GitHub, VS Code

Strengths

- Quick learner, able to pick up new frameworks and tools independently, with a strong problem-solving mindset and attention to detail.
- Consistent version-control practices using Git & GitHub; passionate about writing clean, readable, and maintainable code.
